

2 Compartment Frusheez® Machine

BEFORE YOU BEGIN:

✓ Please make sure to read ALL instructions and power requirements for this machine immediately.

✓ **IF you have any problems, you MUST call (260) 415-2461 within 1 hour of receipt.**

NO REFUNDS WILL BE GIVEN.

IMPORTANT INFORMATION:

***** DO NOT SET MACHINE IN DIRECT SUNLIGHT. *****

***** DO NOT USE EXTENSION CORD(S). *****

***** WE ONLY GUARANTEE OUR FRUSHEEZ® DRINK MIX FLAVORINGS. *****

OPERATING INSTRUCTIONS:

1. Fill the mix tank with the desired liquid product (3 gallons maximum). Do not overfill tank. **NOTE THAT WHEN READY, SLUSH OCCUPIES MORE VOLUME THAN THE LIQUID (approximately 3.5 gallons of slush for 3 gallons of liquid).**
2. To access the switches, open the switch panel cover by pushing on the side (arrow **A**) and pulling (arrow **A'**) [Fig. 1].
3. To operate, press main power switch and agitator switch to ON positions [Fig. 2].
NOTE: The agitator switch must be in the ON position before setting slush mode.
4. For slush, press the cooler switch to bottom position (II / *).

NOTES:

- This machine is equipped with a time delay relay that provides for a four minute delay from the time of the initial start. This is to prevent the compressor from short cycling. Once the compressor is ON, the green light will be on.
- The cooler switch is a three position switch and in order to have the compressor off, all the cooler switches need to be in the middle position.
- To illuminate the mix tank cover display on top of the unit and the product in the compartments, press the display light switch to down position (I).

CAUTION: If the machine is stopped at night with ice in the tank, remove all ice slabs before starting.

DRINK MIX INFORMATION

- We only guarantee our Frusheez® drink mix flavorings.
- This machine is calibrated to work properly with the Frusheez® mixes we provide.
- Excessive sugar and alcohol act as antifreeze to this machine.
- Do NOT use diet drinks or Country Time Lemonade as they are too sweet and will not work in the machine.

HELPFUL HINTS

- Pre-chilling will reduce batch time from approximately 45 minutes to approximately 15 minutes.
- You can store finished slush in refrigerator or freezer to be ready to serve larger volumes at the beginning of your event.
